Experience what are the technology-to-nature to create spa therapies Cristina has inspired.

Chromatherapy

Color has a tangible effect on feelings of well-being and comfort. It's even believed that color can affect our mental and emotional states. Cristina overflow bathtub with chromatherapy option not only makes the innovative retreat but also offers a luxurious opportunity to immerse yourself in pure, healing hues. After slip into the peaceful warmth of cascading water, just let each color gently wash over you. The sequence lasts about one minute, and then repeats, but the simple push of a button lets you rest on any color you like. Each color has its own qualification of retreat. White composed of all the colors of the light spectrum, offering soothing relief to the body, while violet is an imaginative and intuitive tone. Green renews and promotes harmony and balance. Blue calms the senses and inspires the soul. Yellow makes you feel hopeful, illuminating and adventurous. Red brings feeling of courageous, energizing.

Hydrothermal therapy

Hydrothermal therapy is the use of soaking tubs which water and temperature are involved in. Generally, heat quiets and soothes the body. Cold, in contrast, stimulates and invigorates. Water temperature should be 92 to 94 degree F. except when used for loosening tense muscles and reducing the pain of stress-related backaches, the temperature should be 102 degree F to 106 degree F. A hot bath is used for relaxation, lowering the body's energy. It stimulates sweating and increases the elimination of toxins. To enhance the process, you might add fresh herbs or the essential oils to the bath. Adding Epsom salt to the bath helps arthritis and rheumatism; and sea salt promotes healing, reduces inflammation and prevents infection.

A cold bath is highly invigorating! Cold water applied to any part of the body causes an initial chilling effect, followed by dilation of the small blood vessels in the skin. The increased blood flow suffuses the whole area with a reddish, warming, and healthy glow. Please note, however, that this should be for no longer than 15 minutes at a time. Evening is the ideal time for soaking. It helps induce sleep. With its safety-focusing system of hi-technology, Cristina overflow tub supports Hydrothermal therapy to your bathing with reliability and satisfaction.

Aromatherapy

Aromatherapy is the art and science of using essential oils from various plant sources to improve one's health. There are approximately 300 essential oils and related natural aromatic products currently available. But true aromatherapy is not simply a matter of using fragrant products. One of the most delightful ways of experiencing an aromatherapy treatment is in the bath. Add up to 10 drops to the water just before getting in, swoosh the water and let yourself unwind and relax... or surround yourself with scented candles while soaking. Cristina overflow tub enhances your aromatherapy bathing to perfect without the trace of the essential oil left in the tub because it uses the quality material which preserves the environment. Absolutely, its feature and surface are rapid draining of humidity, easy-to-clean and durable-for-scratch.

Hydrotherapy

Hydrotherapy, or water therapy, is one of the oldest, safest, and least expensive methods treating many common ailments. Nowadays it is very popular at world-class health spa nearly everywhere, but with the advent of hydro-massage whirlpools. It can now experienced in the comfort and privacy of one's own home. Having a whirlpool spa in o master bath is like having a personal masseuse available 24 hours a day, 7 days a we without the cost and inconvenience. The warmth of the whirlpool's hot water relie muscular pain and stiffness, while its hydro massage feature relaxes the body and clears mind. The water and air (or air alone) forced through the jet nozzles of the whirlpool crea such an action - - whether to unwind from the complexities of everyday life, to rel muscular pain, or just to allow more restful sleep. Hydrotherapy contributes to well-be naturally. For the highly benefit, Christina overflow bathtub designs with intellec engineering of the whirlpool or/and air-pool jets with suitable positions which can rel muscle tensions in six areas of the body: neck, shoulder, mid-back, lower back, thig and feet.

Ozone therapy

Ozone is an activated, trivalent (three atoms) form of oxygen. Oxygen is O_2 whereas ozon O_3. Ozone is viruscidal germicidal, bactericidal, and fungicidal elimination.Ozone ther itself is subdivided into a number of different methods, some of which can be s administered with an Oxygen cylinder and a medical Ozone generator. These meth include Ozonating water (useful for bladder, stomach and kidney problems in particu vaginal/bladder insufflations for reproductive and genito-urinary problems, ear insufflat for problems of the ears, eyes, sinuses and brain, and rectal insufflations for problems of colon. Ozone bathing increases ozone air which is insufflated into the blood circula through the breath and skin. It is similar to auto-haemotherapy where blood mixed Ozone eliminating the diseases and increasing pure air to the direct intra-venous inject rather like dialysis. Cristina overflow bathtub offers Ozone therapy option to your bathing its newly developed purifier and ozonizer. It functions sterilization and deodorization wh not only makes pure air and pure water, but also truly offers health benefit to the body mind as mentioned above.

CHROMOTHERAPHY

ENVIRONMENT PRESERVATION

No plywood or chip board inside the layer of tub. Only recycle casting poly-mer to ensure rigidity. Environment preservation free from damp and swell. Retain a brilliant,vibrant gloss over life time of use.

Breaker system

For protection of earth leakage and short circuit compose of ELB whenever there is any leakage more than 10 mA. Short circuit breaker will protect any short circuit or over current in the system.

LED Light Touch Pad

Classical design for easily use with auto and manual button.

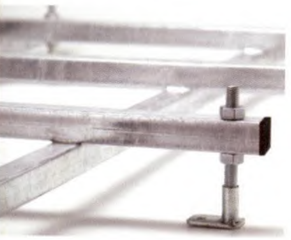

Chromotherapy LED Light

For chromotherapy action with 10 colors using high quality LED from USA or Europe. Sharp color and color change smoothly providing relaxation atmosphere.

Blower with ozone generator

High quality blower provides air flow to air bubble to give a mild massage to body like mum tapping baby. With ozone generator making ozone from intake air to purify water and kill all germs.

Bath cradle

Made of galvanized mild steel for rust proof with adjustable range 100 mm. supports.

Pump

High quality pump with long life mechanical seal from Europe.

Flow Diverter

For selection locally massage to back jet, neck jet or feet jet
